Start of Project

May, 2005

Completion Date

July 2006

Estimated Construction Cost

\$11,000,000

Project Engineer

Russell Glime

Construction Management services were provided for this 8 mile-paving project of USH 141 in Oconto County. The multi-stage project is 8 miles of 4-lane highway with a diamond interchange. The work consisted of concrete pavement, base, pipe underdrain, asphalt shoulder and side roads, permanent signing, two railroad crossings, 4 miles of grading for the additional lanes, traffic control, a concrete box culvert and a bridge crossing a river.

This project also included reconstruction of existing USH 141 in the community of Lena. The work involved replacing the curb & gutter, storm sewer, milling the existing pavement and asphalt pavement.

Project Deliverables:

- Project administration, budgeting, and monitoring
- Project scheduling with complex staging
- Field Manager / Project Estimates / Contractor Payment
- Public Coordination between government, city, private sector, and citizens
- Coordinating with utilities (Trans 220)
- DNR Coordination
